PERSONAL EMERGENCY EVACUATION PLAN (PEEP)

A Personal Emergency Evacuation Plan (PEEP) is a plan for a person who may need assistance to evacuate a building or reach a place of safety in the event of an emergency.

The purpose of a PEEP is to provide people who would have difficulty self-evacuating in the event of a fire with a tailored evacuation plan in case they need to do so in a fire emergency.

These reasons for this difficulty could include (but are not limited to) people having:

- Mobility impairments (including wheelchair users)
- A cognitive impairment
- A hearing impairment and/or being deaf
- A visual impairment and/or being blind

The Aim of the Personal Emergency Evacuation Plan

The aim of the PEEP is for residents and those responsible for the management of fire safety in the building to think through the available options and consider how that resident can evacuate safely in light of fire safety information and the existing fire safety strategy for the building.

Details of the fire strategy can be found in the entrance hallway of your block – please ensure you or your tenant familiarises themselves with this.

Please can you inform us if you or your tenant requires a PEEP and to get in touch with us with the following information:

- Name of Resident
- Full Address (including flat and floor number)
- Contact details
- Personal circumstances of the resident, (e.g., mobility issues, cognitive impairment, etc.)

We will then share this information with the local Fire and Rescue Services as well as documenting this in the Premises Information Box that is located in the entrance hallway for the use of the Fire Service.

The safety of residents is our primary concern so we do ask that you provide us with this information where required as soon as possible and keep us to date with any change in tenancy.
